About

- As a recent graduate in fullstack development, I specialize mainly in Java and Angular JS. I have accumulated experience through working on Spring Boot projects and received an Encouragement Award at the 2023 vocational skills competition.
- I am comfortable, cheerful, and possess good communication skills. I excel in both team collaboration and independent work. Proficient in reading and understanding English documentation, I am committed to continuous self-improvement and learning necessary technologies.
- In my work, I always aim to enhance my coding skills and problem-solving abilities. My goal is to evolve into a global developer, proactively keeping up with emerging trends and making positive contributions to the IT industry.

Skills

- - **Front-end:** HTML, CSS, JavaScript
 - **Back-end:** Java, Node JS
 - **Frameworks:** Spring boot, Hibernate, JPA, Bootstrap, Angular JS, Nest JS
 - **Databases:** SQL Server, My SQL, PostgreSQL
 - **Tools:** Git, GitHub, Gitlab, Postman
 - **Others:** Docker, Docker Compose, GitLab CI/CD
 - **Languages:** English – Completed 4 levels of english at school (equivalent TOEIC 550); Japanese – Basic.
